

SENIOR PROJECT ENGINEER

JOB SUMMARY:

Peralte-Clark is looking for an innovative and driven Senior Project Engineer to join our growing company. This individual will work closely with our client and internal staff to drive our projects forward to completion. We are a young and dynamic company and are looking for a passionate individual with an entrepreneurial spirit who is willing to do what it takes to support our growth.

ABOUT US:

Peralte-Clark, LLC is a rapidly growing civil engineering firm founded by two industry veterans. We aspire to be a forward-looking, agile firm on the leading edge of the industry. To accomplish our goal, we need resourceful, innovative teammates with a singular focus for client satisfaction.

We offer preliminary and final design engineering, and construction observation services. Our firm focuses on general civil and transportation engineering projects including roadway, rail, site and highway design.

We pride ourselves on being a true team with real camaraderie. We believe in the vision of the firm and are committed to building something special. We leverage the latest technology to accommodate work schedule flexibility and achieve work-life balance. We will support you in building a rewarding career.

RESPONSIBILITIES AND DUTIES:

Responsible for all Civil Engineering tasks including but not limited to:

- Lead and manage construction document preparation including drawings, project specifications and cost estimates for clients such as the Illinois Tollway, IDOT, and local municipalities and counties
- Work with other managers, engineers, and staff to develop budgets, schedules and project delivery plans
- Develop scope and level of effort estimates for project negotiations
- Perform regular design reviews with staff
- Develop and implement project design workflows to ensure consistent high-quality project delivery
- Mentor junior level staff to expand their capabilities

QUALIFICATIONS AND SKILLS

- 10+ years of civil engineering experience with a current Illinois Professional Engineer License
- Strong technical leadership skills with a proficient understanding of multiple disciplines and technical standards
- Team-oriented, “start-up” mentality to proactively provide innovative solutions for projects and internal processes
- Proficiency in Microsoft Office software (Word, Excel, PowerPoint, etc.) and CAD design software including Microstation, PowerGeopak SS4/10
- Excellent organizational, interpersonal, and communication skills
- Strong leadership skills with a track record for project scope, budget, and schedule goals.

If you are interested in being part of something truly special, send your resume and cover letter to careers@peralte-clark.com.

Staff Testimonial

“Working for Peralte-Clark has provided multiple opportunities to be impactful to a growing business. If you’re looking for a workplace where you are empowered to implement your ideas and initiatives, then Peralte-Clark would be a great fit for your next opportunity.”
